Industrial applicability (IA)	Claims	1-11	YES

2. Citations and explanations

1. This report makes reference to the following document:

D1: DE 196 35 869 C1 (DAIMLER BENZ AG) 22 January 1998 (1998-01-22)

2. D1 is regarded as the prior art closest to the subject matter of claim 1. D1 discloses (the reference in parentheses are to D1):

a folding top for a vehicle, said top having a folding top compartment lid with a retaining element that cooperates with the folding top when the folding top is lowered and the lid is closed.

Thus the subject matter of claim 1 differs from the known retaining element in that the retaining element has a counter member that is supported on the folding top compartment lid in such a way that it can swivel.

- 2.1 The subject matter of claim 1 is therefore novel (PCT Article 33(2)).

- 2.2 The problem to be solved by the present invention can therefore be regarded as that of making the retaining element adaptable to a swivel and lift movement of

the folding top compartment lid.

- 2.3 The solution to this problem as proposed in claim 1 of the present application involves an inventive step for the following reasons (PCT Article 33(3)):
- a retaining element with a counter member that is supported on the folding top compartment lid in such a way that it can swivel is neither known nor obvious from the available prior art.
3. Claims 2 to 11 are dependent on claim 1 and therefore also meet the PCT requirements for novelty and inventive step.
4. The subject matter of the claims relates to rattle-free securing of a folding top and is industrially applicable, for example, in convertible vehicles.
